REIT/InvIT Market

— REAL USER STORY

Meet Priya

28 yrs · Software Engineer, Pune · ₹1.2L/month income · 4 years investing

"I have ₹3.8L in Zerodha, ₹1.2L in Groww, some MFs in Kuvera. I have NO IDEA what my total portfolio is worth right now."

"My CA told me to consider REITs for passive income. I literally Googled "what is REIT" and fell down a rabbit hole for 2 hours."

"For ITR, I had to download 3 different statements, manually add up numbers in Excel. Took me an entire Sunday."

"A colleague put ₹50,000 in F&O tips from a WhatsApp group and lost everything. Nobody warned her about the risk."

What Priya Actually Needs:

One true view of all investments

Cross-broker aggregation via AA framework

Understand REITs in 5 minutes

AI vernacular financial education

Know which products suit ME

Dynamic AI suitability engine

Alerts before I do something dumb

Behavioral nudges + scam detection

Actually invest from same app

Multi-asset marketplace, 1-click

Dhan Sarthi solves all 5 of Priya's problems in one app

Good platforms exist, but **no one does it all**

Introducing **Dhan Sarthi** : One app, **four superpowers**

Dhan Darpan

Portfolio Mirror

- › Account Aggregator (AA) framework integration
- › Real-time cross-broker portfolio view
- › NSDL + CDSL unified demat data
- › MF data via CAMS / Kfintech RTA
- › True net-worth: stocks + MF + bonds + gold
- › Auto capital gains calculation for ITR
- › Risk & concentration analysis dashboard

Dhan Gyaan

Knowledge Hub

- › AI-powered content in 12 Indian languages
- › Bite-sized 'Learn in 5 mins' explainers
- › Gamified learning with badges & streaks
- › SEBI circular explainer in plain Hindi
- › Interactive SIP / bond yield simulators
- › Personalised learning path from holdings
- › 'Before you invest' mandatory education

Dhan Marg

Investment Pathways

- › AI Suitability Engine: dynamic risk profiling
- › Multi-asset marketplace: REITs, InvITs, Bonds
- › SEBI-registered broker integration
- › Curated 'Thali Portfolios' balanced by goal
- › Goal-based investing (home, retirement...)
- › SIP automation across asset classes
- › One-click invest after suitability check

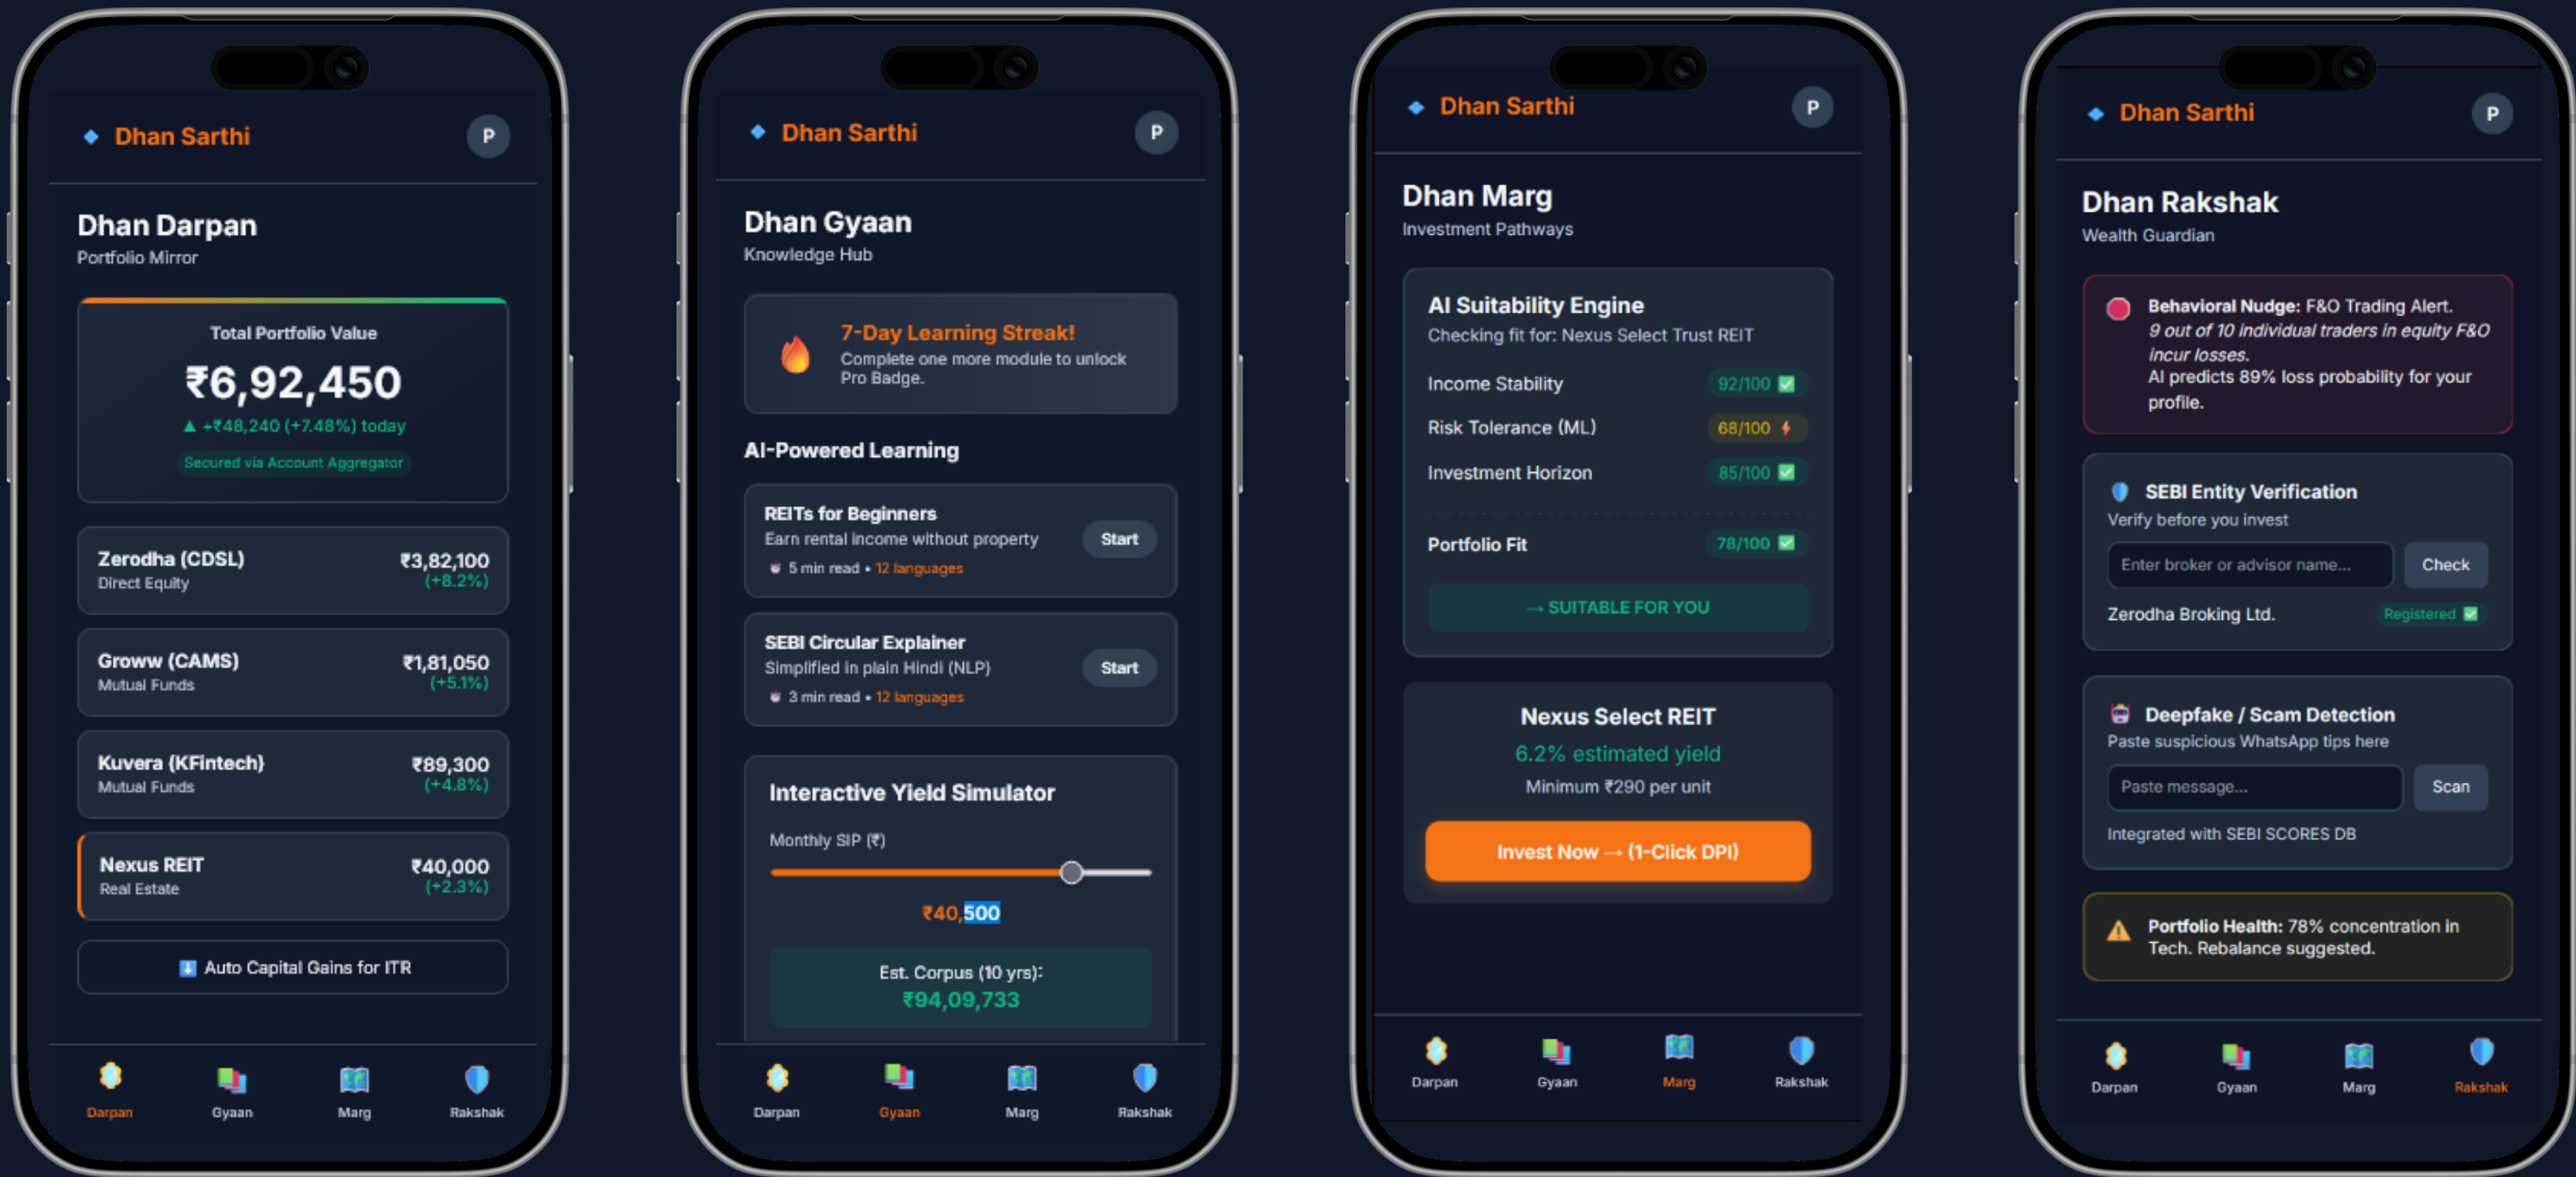

Dhan Rakshak

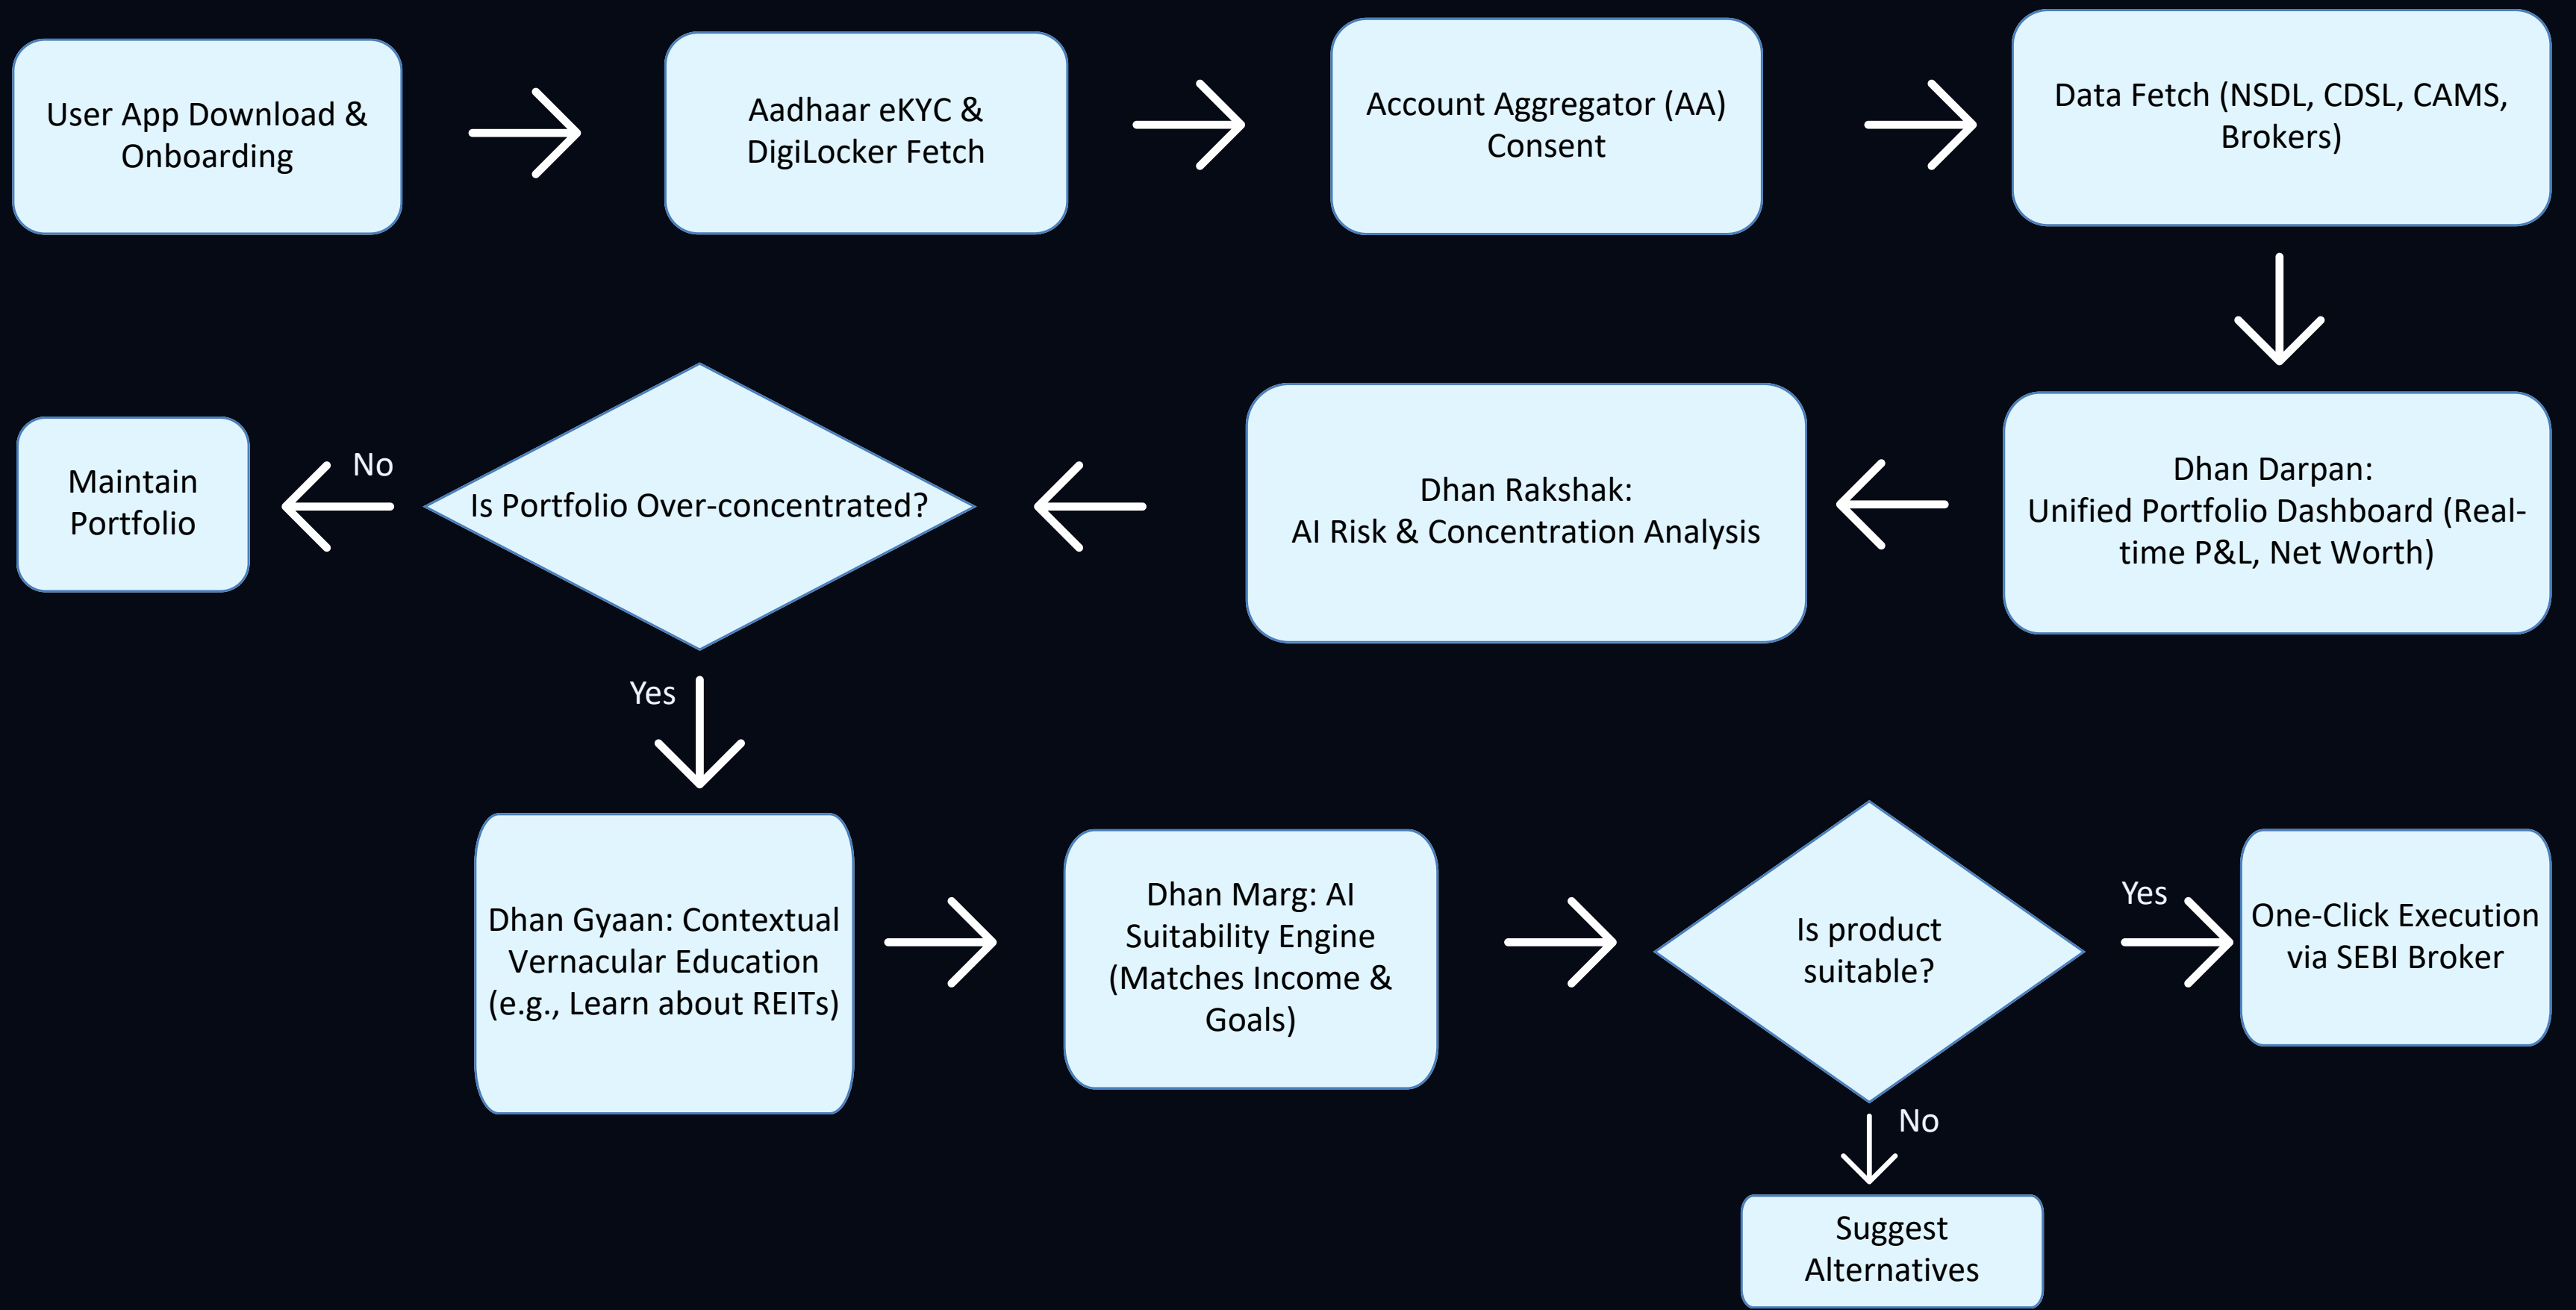

Wealth Guardian

- › SEBI entity registry live verification
- › AI deepfake detection for investment content
- › Behavioral nudges before emotional decisions
- › Portfolio health alerts (over-concentration)
- › Regulatory compliance score for portfolio
- › F&O risk warning with loss-probability AI
- › Scam alert DB (SEBI SCORES integration)

Live screens from the app

Process Flow Diagram

Built on India's DPI stack

CLIENT LAYER	React Native (Expo) — iOS + Android	Offline-first PWA			
API GATEWAY	GraphQL Unified API	Node.js REST Gateway	OAuth 2.0 + JWT Auth	Rate Limiting & Circuit Breaker	
AI / ML LAYER	Gemini API — Conversational AI	LangChain — Agentic Suitability	NLP Sentiment Analysis	Risk Profiling ML Model	Deepfake Detection CNN
AGGREGATION LAYER	Account Aggregator Framework	CAMS/KFintech RTA API	NSDL + CDSL Depository APIs	NSE/BSE Market Data Feed	
DATA LAYER	PostgreSQL — Transactional	MongoDB — Portfolio Events	Redis — Real-time Cache	Apache Kafka — Event Streaming	
INFRA / SECURITY	AWS / GCP Cloud Native	Aadhaar eKYC	DigiLocker Integration	Hyperledger — Consent Audit	AES-256 Encryption

Built with **production-grade tech**

Frontend / Mobile

- **React Native (Expo)**
Primary mobile — iOS + Android from one codebase. EAS builds, OTA updates.

AI / ML

- **Google Gemini API**
Multilingual financial education generation, conversational AI advisor.
- **LangChain**
Agentic workflows for multi-step suitability assessment and rebalancing.
- **HuggingFace Transformers**
NLP for news sentiment, SEBI circular summarisation, scam text detection.

Infrastructure

- **AWS / GCP**
Cloud-native, auto-scaling, multi-AZ for 99.9% uptime.
- **Apache Kafka**
Event streaming for real-time portfolio updates and market events.
- **Redis + PostgreSQL + MongoDB**
Caching, relational transactions, flexible portfolio event store.
- **Hyperledger Fabric**
Blockchain immutable audit trail for consent (DPDP Act compliance).

Backend

- **Node.js + Express**
API Gateway, auth, user management, real-time WebSocket price feeds.
- **FastAPI (Python)**
AI/ML service endpoints, suitability engine, risk-profiling APIs.
- **GraphQL (Apollo Server)**
Unified data layer — one query fetches all asset classes.

Data & Integration

- **Account Aggregator Framework**
Sahamati-certified consent-based aggregation across all FIPs.
- **CAMS + Kfintech RTAs**
MF portfolio, NAV, transaction history across all fund houses.
- **NSDL / CDSL APIs**
Demat holdings, corporate actions, margin information.
- **NSE / BSE Market Data**
Real-time prices, historical data, order routing for execution.

Three revenue engines, **one mission**
